Krishi Vigyan Kendra, Banswara

Directorate of Extension Education

Maharana Pratap University of Agriculture & Technology, Udaipur

Annual Progress Report

April 2014 To March 2015

COMPILED BY DR. R.L.SONI DR. G.L.KOTHARI RASHMI DAVE

ANNUAL PROGRESS REPORT 2014-15

(01.04.2014 TO 31.03.2015)

1. GENERAL INFORMATION ABOUT THE KVK

1.1. Name and address of KVK with phone, fax and e-mail

Address	Tele	phone	Email	
Krishi Vigyan Kendra, Borwat Farm,	Office	FAX	Eman	
Banswara	02962-260069	02962-260069	kvkbasnswara@gmail.com	

1.2 . Name and address of host organization with phone, fax and e-mail

Address	Telep	E mail	
Address	Office	FAX	
Maharana Pratap University of Agriculture & Technology, Udaipur	0294-2417697	0294-2412515	dir_ext@rediffmail.com

1.3. Name of the Programme Coordinator with phone & mobile No

1011 tame of the 110gramme coordinator with phone to mobile 10							
Name		Telephone / Contact					
	Residence	Mobile	Email				
Dr. R.L. Soni	02962-260084	9460410283	kvkbanswara@gmail.com				

1.4. Year of sanction: 1983

1.5. Staff Position (as on 31th March 2015)

1.5	1.5. Stan Position (as on 51 March 2015)								
Sl. No.	Sanctioned post	Name of the incumbent	Designation	Discipline	Pay Scale (Rs.)	Present basic (Rs.)	Date of joining	Permanent /Temporar y	Category (SC/ ST/ OBC/ other
1	Programme Coordinator	Dr. R.L. Soni	Programme Coordinator	Agriculture Extension	37400- 67000	52250	18-9-07	Temporary	OBC
2	Subject Matter Specialist	Dr. Ranjeet Singh	Subject Matter Specialist	Soil Science	15600- 39100	27990	6-7-06	Temporary	OBC
3	Subject Matter Specialist	Dr. H.L.Bugalia	Subject Matter Specialist	Animal Science	15600- 39100	21600	31.12.2011	Temporary	OBC
4	Subject Matter Specialist	Dr. Ramavtar	Subject Matter Specialist	Agronomy	15600- 39100	21260	14.9.2011	Temporary	GEN.
5	Subject Matter Specialist	Dr. B.S.Bhati	Subject Matter Specialist	Horticulture	15600- 39100	18200	25.6.2013	Temporary	GEN.

2. DETAILS OF DISTRICT (2014-15)

2.1 Major farming systems/enterprises (based on the analysis made by the KVK)

S. No	Farming system/enterprise
1.	Crop based : Maize/Cotton/Soybean/Paddy-Wheat/Rabi Maize/Gram/Summer moong
2.	Horticulture based : Chilli/Tomato/Brinjal/Okra-Wheat/Rabi maize
3.	Live stock based : Cow/Buffalo/Goat

2.2 Description of Agro-climatic Zone & major agro ecological situations (based on soil and topography)

S. No	Agro-climatic Zone	Characteristics
1	23°33" N Latitude, 74°25' E Logitude, Longitude, 220 M MSL	High rainfall and relative humidity

2.3 Soil type/s

S. No	Soil type	Characteristics	Area in
			Percentage
1	Medium black clay soil	Heavier and content high clay, high water holding capacity	10.50
2	Medium brown clay soil	and suitable for cotton and soybean	15.56
3	Medium brown loamy soil		21.55
4	Medium brown gravelly loam	Medium in clay and suitable for vegetables and most crops	13.48
5	Red gravelly loamy hilly sols	Light soils, low water holding capacity and suitable for	3.75
6	Medium red loamy	maize and pulses	21.39
7	Shollow red gravelly loam	Lights soils	13.22

2.4. Area, Production and Productivity of major crops cultivated in the district

S. No	Crop	Area (ha)	Production (Qtl)	Productivity (kg /ha)
1	Paddy	28542	552100	1934
2	Maize	139246	1442860	1036
3	Urd	11520	55230	479
4	Soybean	20429	154550	759
5	Cotton	11954	249600	359
6	Wheat	87177	2037510	2337
7	Barley	1023	16230	1587
8	Gram	13719	134970	984

2.7 Details of	of Operationa	l area / Villages ((2014-15)		
Taluka	Name of the block	Name of the village	Major crops & enterprise	Major problem identified	Identified Thrust Areas
Banswara	Talwara	Masotiya Devliya Sageta Nokala Jhalo Ka Garha	Maize Wheat Soybean Vegetables	 Low productivity of major crops SRR is low. Imblance nutrition. Marketing problem Nondiscribed breed. Poor feeding & management practices in cattle & goat. Poor water management. Mal nutrition ini Child and women. Lack of fish farming. Less area under fruits 	 Enhancing production of common crops. Increasing seed production. Improving the feeding breeding and management practices in cattle and goat. Introduction of Nirbhic & Kadaknaath poultry as back yard poultry faming.

Bagidora	Bagidora	Sangrampura, Dalpura & Khokharwa	Maize Wheat Soybean Vegetables Pulses	 Low yield of major cereals and pulses. Low seed replacement rate of pulses. Non descrpt breed of goat. Malnutrition in farm families. 	
Sajjangarh	Sajjangarh	Goika Pargi, Goika baria, Rupgarh, Jalimpura, Kushalipada, Waka Khunta, Pandwal Lunja, Pandwal Oonkar	Maize Wheat Soybean Vegetables Pulses	 Low yield of major cereals and pulses. Low seed replacement rate of pulses. Non descript breed of goat. Malnutrition in farm families. 	
Ghatol	Ghatol	Kuwania (Azgariyapada, Herpada, Lambaghata, Chunakhora, Charpotapada, Dhanipada) Amarthoon (Upla pada, Nichla pada, Bhompada, Bhompada, Bhanwarvod) Chekla Badhiya Nagwala Madanpura	Maize Wheat Soybean Vegetables Pulses	 Low yield of major cereals and pulses. Low seed replacement rate of pulses. Non descript breed of goat. Malnutrition in farm families. 	

2.7 Priority/thrust areas

S.No.	Thrust area
1	Enhancing productivity of maize, paddy, soybean and cotton during <i>kharif</i> , wheat and gram during <i>rabi</i> and
	moong during zaid season
2	Increasing the seed replacement rate through promotiong seed production techniques of self pollinated crops
3	Diversifications of existing cropping systems by promoting cultivation of vegetables and fruit plants such as
	mango (Malika, Kesar, Dasheri), Aonla (NA 7, Chakya) and Guava (L 49) and conservation of genetic
	resources of mango
4	Promotion dry land farming technologies with emphasis on water harvesting
5	Improving the indigenous breeds of goat by breeding and management
6	Empowerment of women through drudgery reduction in agriculture and animals husbandry, improvement in
	the nutrition, health, hygiene and by using improve agricultural implements
7	Imparting vocational training to tribal youth for self-employment generation on fruit plant nursery raising,
	fabrications of agricultural implements, livestock production, agro processing of soybean & mango

3. TECHNICAL ACHIEVEMENTS

3. A. Details of target and achievements of mandatory activities by KVK during 2014-15

OFT	(Technology Asses	ssment and	Refinement)	FLD (Oilseeds, Pulses, Cotton, Other					
				Crops/Enterprises)					
	-	1			2				
Num	Number of OFTs Number of Farmers				Number of FLDs Number of Farmers

3.B. Abstract of interventions undertaken

						Inter	ventions		
S. No	Thrust area	Crop/ Enterprise	Identified Problem	Title of OFT if any	Title of FLD if any	Title of Training if any	Title of training for extension personnel if any	Extension activities	Supply of seeds, planting materials etc.
1	Enhancement of productivity in cereals pulses & oil seed	Maize, wheat,paddy, gram, cotton, summer moong and soybean	Low productivity	-	FLD's on maize, wheat and summer moong (285)	Integrated crop management (12)	Recent advances in crop production (2)	6	High yielding variety seed, hybrid seeds and fertilizers
2	Crop diversification	Plantation of orchard	Low productivity in traditional crops	-	-	2	-	4	Supply of planting material

3	Increase productivity in milch animal	Animal husbandry	Low milk yield in buffaloes	-	-	Use of processed soybean in buffalo diet for better production (7)	-	13	Supply of soybean grain for feeding after being proceed
4	Promotion of horticultural crops	Vegetable cultivation	Poor quality vegetable cultivation	-	-	Vegetable cultivation	-	4	Supply of hybrid seeds of vegetables
5	Improvement in nutritional status	-	Malnutrition in farm families	-	Demonstration on low cost recipies addition of soybean in India	Balance diet (8)	Diet for Vulnerable group (29)

B. Details of each On Farm Trial to be furnished in the following format

A. Technology Assessment

Trial 1 (Soil Science)

1) Title : Zinc nutrition to Maize
2) Problem diagnose/defined : : Zinc deficiency in crops

3) Details of technologies : T₁. Farmers practice (110:60:0 kg N, P₂O₅ and K₂O/ha)

selected for assessment T_2 RDF (120:40:15 kg N, P_2O_5 and K_2O /ha)

/refinement T_{3-} RDF+ZnSo₄@25kg/ha

4) Source of technology : KVK, MPUAT, Banswara

5) Production system

thematic area : Maize/Soybean/Cotton/Paddy-Wheat/Rabi maize-Summer moong

6) Thematic area : Nutrient management

7) Performance of the

Technology with

performance indicators : Yield, net return & B:C ratio

8) Final recommendation for

micro level situation : -

9) Constraints identified and

feedback for research :

10) Process of farmers : All farm operations are done by farmers themselves in collaboration of scientist.

participation and their reaction

11). Results of On Farm Trials

Crop/ enterprise	Farming situation	Problem Diagnosed	Title of OFT	No. of trials*	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer
1	2	3	4	5	6	7	8	9	10
Maize	Rainfed	Zinc deficiency in crops	Zinc nutrition to maize	10	Blanket application of ZnSo ₄ @25kg/ha	Yield, net return and B:C ratio	Grain yield	Increase in yield	-

	Tachnology Assessed	Yield	d (q/ha)	Not Detum (Duefit) in De / unit	BC ratio
	Technology Assessed	2014	2015	Net Return (Profit) in Rs. / unit	be ratio
	11		12	13	14
T ₁₋	Farmers practice (110:60:0 kg N, P ₂ O ₅ and K ₂ O/ha)	19.3	-	-	-
T ₂₋	RDF (120:40:15 kg N, P ₂ O ₅ and K ₂ O /ha)	28.5	-	-	-
T ₃₋	RDF+ZnSo ₄ @25kg/ha	32.7	-	ı	-

A. Technology Assessment

Trial 2 (Soil Science)

Title : Balanced nutrient management in hybrid chilli
 Problem diagnose/defined : Use of unbalanced and inadequate fertilizers

3. Details of technologies : T_{1-} Farmers practice (110:40:0 kg N, P_2O_5 and K_2O/ha and no use of fixed amount of FYM)

selected for assessment T_2 RDF (70:48:50 kg N, P_2O_5 and K_2O and 20 ton FYM/ha)

/refinement T₃₋ Balanced nutrient management (200:100:100 kg N, P₂O₅ and K₂O with 15 ton FYM/ha)

4. Source of technology : KVK, MPUAT, Banswara

Production system

thematic area : Maize/Soybean/Cotton/Paddy-Wheat/Rabi maize-Summer moong

5. Thematic area : Nutrient management

6. Performance of the Technology with

performance indicators : Yield, net return & B:C ratio

7. Final recommendation for

micro level situation : Application of 200:100:100 kg N, P₂O₅ and K₂O with 15 ton FYM/ha found superior over

RDF and farmers practice of nutrient management

8. Constraints identified and feedback for research

1. Poor quality of organic manures

2. Non availability of potassium fertilizers in KVSS / local market

9. Process of farmers participation and

their reaction

their reaction : All farm operations starting from nursery raising to harvesting done by farmer's himself in

collaboration of Scientist

11). Results of On Farm Trials

Crop/ enterprise	Farming situation	Problem Diagnosed	Title of OFT	No. of trials*	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer
1	2	3	4	5	6	7	8	9	10
Chilli (Ujala)	Irrigated	Use of unbalanced and inadequate fertilizers	Balanced nutrient management in hybrid chilli	5	Balance nutrient management	Yield, net return and B:C ratio	Yield	Increase in yield	Farmers agreed to use balance nutrient management practice

		Yield	(q/ha)	Net Return	
	Technology Assessed	2013*	2014*	(Profit) in Rs. /	BC Ratio
		2013	2014	ha	
	11	1	2	13	14
T ₁₋	Farmers practice (110:40:0 kg N, P ₂ O ₅ and K ₂ O/ha and no use of fixed amount of FYM)	123.3	98.2	158600	2.52
T ₂ -	RDF (70:48:50 kg N, P ₂ O ₅ and K ₂ O and 20 ton FYM/ha)	166.6	136.0	233900	3.40
T ₃₋	Balanced nutrient management (200:100:100 kg N, P ₂ O ₅ and K ₂ O with 15 ton FYM/ha)	218.0	186.7	334650	4.78

^{*} Low yield due to unfavorable weather condition

B. Technology Refinement

Trial 3

1. Title : Management of sulphur deficiency in soybean

2. Problem diagnose/defined : Use of high analysis fertilizers and no use of slphur source by farmers

of Banswara district of Rajasthan

3. Details of technologies selected: T_{1-} Farmer's practice (only use of DAP)

for assessment/refinement: T₂. RDF by SSP and urea

T₃. RDF by SSP and urea + Gypsum (250 kg/ha)

4. Source of technology : KVK, MPUAT, Banswara

5. Production system thematic area: Maize/Soybean/Cotton/Paddy-Wheat/Rabi maize-Summer moong

6. Thematic area : Nutrient management

7. Performance of the Technology

with performance indicators : Yield, net return & B:C ratio

8. Final recommendation for

micro level situation : -

9. Constraints identified and

feedback for research : -

10. Process of farmers participation

and their reaction : All farm operations starting from sowing of crop to harvesting will be

done by farmer's himself in collaboration of Scientist

11). Results of On Farm Trials

Crop/ enterprise	Farming situation	Problem Diagnosed	Title of OFT	No. of trials*	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer
1	2	3	4	5	6	7	8	9	10
Soybean	Rainfed	Use of high analysis fertilizers and no use of slphur source by farmers of Banswara district of Rajasthan	Management of sulphur deficiency in soybean	8	Balance nutrient management	Yield, net return and B:C ratio		The grain yield of soybean was superior with T ₃ (RDF by SSP and urea +zipsum 250 kg / ha) over other treatments	

		Yie	eld (q/ha)		Net Return	BC Ratio
	Technology Assessed	2013*	2014	Average	(Profit) in Rs. / unit	(average)
	11		12	12	14	15
T ₁₋	Farmer's practice (only use of DAP)	7.55	7.78	7.66		
T ₂ -	RDF by SSP and urea	8.40	9.95	9.17		
T ₃₋	RDF by SSP and urea + Gypsum (250 kg/ha)	9.20	11.66	10.43		

^{*} Low yield due to high rainfall and rains extended up to month of oct. which led to difficulty in harvesting and threshing of crop

B. Technology Refinement

Trial 4

1. Title : Weed management in Kharif Maize

2. Problem diagnose/defined : No use of herbicides and heavy growth of weeds in kharif season

3. Details of technologies selected : T₁. Farmer's practice (No use of herbicides)

for assessment/refinement: T₂. Recommended practice Atrazine@ 500gm ai/ha as pre-emergence

T₃. Atrazine@ 500gm ai/ha as pre-emergence+2,4-D Sodium salt@400gm ai /ha 30DAS

4. Source of technology : KVK, MPUAT, Banswara

5. Production system thematic area: Maize/Soybean/Cotton/Paddy-Wheat/Rabi maize-Summer moong

6. Thematic area : Weed management

7. Performance of the Technology

with performance indicators : Yield, net return & B:C ratio

8 Final recommendation for

micro level situation : -

9 Constraints identified and

feedback for research : -

10 Process of farmers participation

and their reaction : All farm operations starting from sowing of crop to harvesting was

done by farmer's himself in collaboration of Scientist

11). Results of On Farm Trials

Crop/ enterprise	Farming situation	Problem Diagnosed	Title of OFT	No. of trials*	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer
1 Maize	Rainfed	No use of herbicide s and heavy growth of weeds in kharif season	4 Weed management in Kharif Maize	5	6 T ₁₋ Farmer's practice (No use of herbicides) T ₂₋ Recommended practice Atrazine@ 500gm ai/ha as preemergence T ₃₋ Atrazine@ 500gm	7 Yield, net return & B:C ratio	Yield, net return & B:C ratio	9 The application of Atrazine@ 500gm ai/ha as pre- emergence+2,4-D Sodium salt@400gm ai /ha 30DAS recorded superior yield over farmers practice and	The weed growth was lowest in the treatment no 3 and proper growth and developmen t of the crop.

/ha 30DA	AS				

B. <u>Technology Refinement</u>

Trial 5

1. Title : Crop geometry management of *rabi* maize in canal irrigated areas of Banswara

2. Problem diagnose/defined : High density planting (improper spacing) and use of high seed rate

3. Details of technologies selected : T_{1-} Farmer's practice (crop geometry, 45x15 cm)

for assessment/refinement: T₂. Recommended practice (crop geometry, 60x20 cm)

T₃₋ Suggested new crop geometry, 50x20 cm

4. Source of technology : Discussed in SAC meeting, 2013 at KVK, MPUAT, Banswara

5. Production system thematic area : Maize/Soybean-Wheat/Rabi maize-Summer moong

6. Thematic area : Integrated crop management

7. Performance of the Technology

with performance indicators : Yield, net return & B:C ratio

8. Final recommendation for micro level situation : -

9. Constraints identified and

feedback for research : -

10. Process of farmers participation

and their reaction : All farm operations starting from sowing of crop to harvesting will be

done by farmer's himself in collaboration of Scientist

11). Results of On Farm Trials

Crop/ enterprise	Farming situation	Problem Diagnosed	Title of OFT	No. of trials*	Technology Assessed	Parameters of assessment	Data on the parameter	Results of assessment	Feedback from the farmer

Remarks:

Crop – Maize

1. The low yield could be ascribed to early withdrawl of monsoon, which does not allow proper growth and development of the crop, hence potential yield of the variety was not realized.

Crop - Soybean

1. The soybean variety JS 95-60 is short duration matured in 80-90 day period

2. The low yield could be ascribed to early withdrawl of monsoon, which does not allow proper growth and development of the crop, hence potential yield of the variety was not realized.

Crop - Black gram

- 1. The crop matured in 75-80 days period
- 2. The low yield could be ascribed to early withdrawl of monsoon, which does not allow proper growth and development of the crop, hence potential yield of the variety was not realized.

Crop – Rabi Maize

1. The farmer appreciated variety Bio-9681 and Bio-9682 for their higher yield potential and low damage due to stem borer attack.

Crop -Gram

1. The Gram variety Pratap Chana 1 matured in 100-105 days and the bright yellow seed of the variety fetched higher prices for farmer.

Analytical Review of component demonstrations

Crop	Season	Component	Farming situation	Average yield (q/ha)	Local check (q/ha)	Percentage increase in productivity over local check
Wheat	Rabi 2014- 15	Weed management (Clodinafop 4%+Metsulfuron methyl 1%) No of demo-100(40ha)	Irrigated	Result awaited		-

Technical Feedback on the demonstrated technologies

S. No	Feed Back
1	The black gram variety PU-31, matured in 75-80 days period
2	The soybean variety JS 95-60, matured in 85-90 days period

Farmers' reactions on specific technologies

S. No	Feed Back
1	The black gram variety PU-31, matured in 80-90 days period, farmer appreciated early maturity of the crop.
2	The soybean variety JS 95-60, matured in 85-90 days period farmer appreciated early maturity of the crop

- 3.8 Give details of innovative methodology/technology developed and used for Transfer of Technology during the year : NIL
 - Name of farmer
 - Title of innovations
 - Description of innovation
 - Practical utility
 - Application of innovations
 - Activities conducted for wise spread

3.9 Give details of indigenous technology practiced by the farmers in the KVK operational area which can be considered for technology development (in detail with suitable photographs)

S. No.	Crop / Enterprise	ITK Practiced	Purpose of ITK
1	Animal Husbandry	Use of Asafoetida in curring of bloating in cattle	Curing of blaoting
2	Crop Production	Dusting of wooden ash on infected crops.	For treatment insect affected crops & vegetables
2	Crop Production	Sowing of maize & paddy mixture in case of low rainfod the maize crop surviver if high rain fall ermin than paddy give profit.	To same the time or contigent plan
3	Home Science	Use of Neem leaves in storage of grains.	Save gains

- 3.10 Indicate the specific training need analysis tools/methodology followed for
 - Identification of courses for farmers/farm women Participatory rural appraisal (PRA) Questionnaire
 - Rural Youth

PRA Technology Questionnaire

• Inservice personnel

Meeting

Discussion with ZD, DD, AD and other line department

Interviews

3.11 Field activities

i. Number of villages adopted
ii. No. of farm families selected
iii. No. of survey/PRA conducted
iii. 8

3.12. Activities of Soil and Water Testing Laboratory

Status of establishment of Lab : Working

1. Year of establishment : 2010

2. List of equipments purchased with amount : NIL

S. No.	Name of the Equipment	Qty.	Cost (Rs)

3. Details of samples analyzed so far

Details	No. of Samples	No. of Farmers	No. of Villages	Amount realized
Soil Samples	631	604	54	5730
Water Samples	2	2	2	20
Plant Samples	-	-	-	-
Petiole Samples	-	-	-	-
Total	633	606	56	5750

4.0 IMPACT

4.1. Impact of KVK activities (Not to be restricted for reporting period).

Name of specific technology/skill	No. of	% of	Change i (R	
transferred	participants	adoption	Before	After
			(Rs./Unit)	(Rs./Unit)
Seed Replacement	1200	100	8500	9800
Balance Fertilizer	600	68	5500	6500
Seed Treatment	700	32	7000	9500
Introduction of Vegetables	400	68	10000	14000

Cases of large scale adoption

- (i). ST with endosulfan in wheat or termite ontrol.
- (ii). Use of Azatobactor culture, PSB, Rhizobium culture in cereal, oilseed and pulses crop.
- (iii). Azola plantation in large scale.

4.3 Details of impact analysis of KVK activities carried out during the reporting period

- (i) Through FLD programme yield increases 25-30% in oilseed crop and increase of pulses crop 20-80%
- (ii) 20-25% yield increases through refinement of existing technology by solving local problem in agriculture through OFT e.i Trichoderma for the control of wilt in chickpea, increase yield and soil fertility through ermin composting and bio fertilizer.
- (iii) Bee- keeping earning Rs. 60,000- 70,000 from twenty colonies.

S. N.	Name of specific technology/skill transferred	No. of % of participants adoption		Change in income (Rs.)	
				Before (Rs./Unit)	After (Rs./Unit)
1	Crop production technology, improved seed, fertilizer application, sowing method, irrigation schedule, PP measure, vermicompost etc	80	80	8000	12000
2	Production practices in cows, buffaloes and goats	80	80	5000	6000
3	Horticulture activities— orchard development, vegetable production	80	70	16000	22000
4	Home Science – Stiching, kitchen gardening, food processing	50	48	2000	5000
5	Soil test based fertilizer recommedation	80	70	3000	3300
	Horizontal expantion of FLD technologies	Seed of our have been incre			

5.0 LINKAGES

5.1 Functional linkage with different organizations

S.	Name of Organizations	Nature of Linkage	
1.	Agriculture Research Station,	Recourse person in training and farmers scientist	
	Banswara	interaction in different occasion	
2.	Deptt. of Agriculture (GOR),	Training and Extension activities	

	Banswara	
3.	Deptt. of Horticulture (GOR),	Training and Extension activities
	Banswara	
4.	Deptt. of Soil Conservation	Training and Extension activities
5.	Deptt. of Animal Husbandry	Training and Extension activities
6.	Deptt. of Women and Child Welfare	Training and Extension activities
7.	Gramin Vikas Trust	Joint implementation of the extension activities &
		consultancy
8.	SWACH Pariyojna	Training extension activities
9.	Progress Santha	Joint implementation of the extension activities
10.	World Vision	Joint implementation of the extension activities
11.	Rajasthan State seed corporation	Seed production programme & information exchange
12.	KRIBHCO/ IFFCO	Joint implementation of extension activities
13.	ASSEF (NGO)	Joint implementation of extension activities
14.	BAIF (NGO)	Joint implementation of extension activities
15.	Chambal Fertilizer	Joint implementation of extension activities
16.	AIR Banswara	Broadcasting radio talks

5.2 List special programmes undertaken by the KVK, which have been financed by State Govt./Other Agencies

Name of the scheme	Date/ Month of initiation	Funding agency	Amount (Rs.)

5.3 Details of linkage with ATMA

a) Is ATMA implemented in your district

Yes

S. No.	Programme	Nature of linkage	Remarks
1	Farmers Training	Training & Meetings,	
1		Exposure Visit.	

5.4 Give details of programmes implemented under National Horticultural Mission: NIL

S. No.	Programme	Nature of linkage	Constraints if any

5.5 Nature of linkage with National Fisheries Development Board : NIL

	1,44411 01 11111180 1111111111111111111111									
S. No.	Programme	Nature of linkage	Remarks							

6. PERFORMANCE OF INFRASTRUCTURE IN KVK

6.1 Performance of demonstration units (other than instructional farm)

Domo	Year		Details of production			Amount (Rs.)

Annexure **District Profile - I**

General description of the District - Banswara

Banswara district is a tribal dominated district falls in agro climatic zone IV B (Humid southern plain). The district is having 5.06 lac hectare geographical area out of which 2.4 lac hectare is under cultivation and 1.1 lac hectare is under forest. The average annual rainfall of the district is 1032 mm. Canals of Mahi Bajaj Sagar are the major sources of irrigation and covers 73% of the total irrigated area. Maize is the major crop of district cultivated in 1.5 lac hectare area during Kharif and 12-15 thousand hectare in rabi season. Other major Kharif crops are paddy, black gram and cotton while wheat, maize and gram are major rabi crops and green gram is the major crop of zaid. The major fruit crops are mango, anola, lemon and guava. The other horticultural crops grown are chillies, tomato, ginger, fenugreek and marigold.

1. General census

Population -	Male Female Total 719581 701020 1420601
Population density	298 / km2
Literacy %	44.63
Total animal & Back yard poultry	1903390 -nos

2. Agricultural and allied census

Geographical area	453612 ha
Forest	91200 ha
Uncultivated land	62977 ha
Permanent pasture	120 ha
Net cultivated area	224605 ha
Cropping intensity	142%
Irrigated area	107350 ha

- 5. Major and micro farming systems
- **6.** Major production systems like rice based (rice-rice, rice-green gram, etc.), cotton based. etc.

A. Maize based - I Maize- Wheat

II Maize- Wheat- Moong

III Maize – Maize

B. Soybean based I Soybean – Wheat- Moong

II Soybean- GramIII Soybean - Maize

C. Cotton based I Cotton- Wheat- Moong

II Cotton- Moong

7. Major agriculture and allied enterprises

Agro-ecosystem Analysis of the focus/target area - II

Include

- 1. Names of villages, focus area, target area etc. Vajvana, Kohala, Tanda, Munthli, Sageta, Jhalo ka guda, Masotiya, Devliya, Sundni, Janthoda, Bhudanpura, Daiyna, Sagawadia, Vajakhera, Sungrampura, Gradia, Kataria, Kanthal, Sogpura, Chodatalai, Dalpura & Khokharwa.
- 2. Survey methods used (survey by questionnaire, PRA, RRA, etc.) PRA
- 3. Various techniques used and brief documentation of process involved in applying the techniques used like release transect, resource map, etc PRA techniques.
- 4. Analysis and conclusions
- 5. List of location specific problems and brief description of frequency and extent/ intensity/ severity of each problem.
 - 1. Low productivity of wheat, maize and gram
 - 2. High seed rate in wheat crop.
 - 3. Zink deficiency in soil for Maize and Paddy.
 - 4. Negligible area under vegetable and fruits.
 - 5. Seed replacement rate is very low.
 - 6. Low productivity of Goat, Cattle and buffalo.
 - 7. Under feeding to cattle and buffalo.
 - 8. Soil P^H is high.
 - 9. Mismanagement of cow dung.
 - 10. Insect and pest in soybean.
 - 11. Improper water management

6. Matrix ranking

- 1. Cultivation practices of *Kharif, Rabi* and Summer crops. Like Maize, Cotton, Wheat, Gram Tur, Moong etc.
- 2. Cultivation practices of vegetable crops like cal crops, onion, garlic, tomato, chilli, cucurbits etc.
- 3. Efficient use of water said and available resources
- 4. Management of saline soil.
- 5. Management at goat.
- 6. How to rare back yard poultry

- 7. Drudgery reduction practices in agriculture.
- 8. Fruit preservation practices.
- 9. Methods of mango plantation in orchard
- 10. Seed production techniques of various crops and vegetable
- 11. How to get green fodder round the year.

7. List of location specific thrust areas

S.No.	Thrust area
1	Enhancing productivity of maize, paddy, soybean and cotton during kharif, wheat and gram
	during rabi and moong during zaid season
2	Increasing the seed replacement rate through promotiong seed production techniques of self
	pollinated crops
3	Diversifications of existing cropping systems by promoting cultivation of vegetables and fruit
	plants such as mango (Malika, Kesar, Dasheri), Aonla (NA 7, Chakya) and Guava (L 49) and
	conservation of genetic resources of mango
4	Promotion dry land farming technologies with emphasis on water harvesting
5	Improving the indigenous breeds of goat by breeding and management
6	Empowerment of women through drudgery reduction in agriculture and animals husbandry,
	improvement in the nutrition, health, hygiene and by using improve agricultural implements
7	Imparting vocational training to tribal youth for self-employment generation on fruit plant
	nursery raising, fabrications of agricultural implements, livestock production, agro processing
	of soybean & mango
8	Exploring possibilities of aqua culture in tribal belt of Banswara

8. List of location specific technology needs for OFT and FLD

- 1. Short duration and high yielding varieties of Gram, Wheat, & Maize crops.
- 2. Seed production programme use breeder/founder seed self pollinated crops.
- 3. Feeding, breeding and management practices of cattle, Goat and buffalo.
- 4. Introduction of Nirbhik poultry.
- 5. Proper vaccination and treatment for animals
- 6. Recommendation of NPK on soil test based
- 7. Use of gypsum or organic manure for soil reclaimation
- 8. INM, IPM, IDM, practices.
- 9. Methods for increasing water use efficiency
- 10. Compost, FYM and Vermicompost making
- 11. Vegetable and fruits cultivation technology

9. Matrix ranking of technologies

- Cultivation practices of Kharif, Rabi and summer crops. Like maize, Cotton, Wheat, Gram Tur, Moong etc.
- Cultivation practices of vegetable crops like cole crops, onion, garlic, tomato, chilli, cucurbits etc.
- > Efficient use of water and available resources
- ➤ Management of saline soil.
- Management of goat.
- ➤ How to rear back yard poultry
- > Drudgery reduction practices in agriculture.
- > Fruit preservation practices.
- Methods of mango plantation in orchard
- > Seed production techniques of various crops and vegetable
- ➤ How to get green fodder round the year.

10. List of location specific training needs:

- 1. Cultivation practices of *Kharif, Rabi* and summer crops. Like maize, Cotton, Wheat, Gram Tur, Moong etc.
- 2. Cultivation practices of vegetable crops like cole crops, onion, garlic, tomato, chilli, cucurbits etc.
- 3. Methods of mango plantation in orchard
- 4. Seed production techniques of various crops and vegetable.
- 5. Efficient use of water and available resources
- 6. Management of saline soil.
- 7. Management of goat.
- 8. Feeding, breeding and management of cow and buffalo.
- 9. How to rear back yard poultry
- 10. How to get green fodder round the year.
- 11. Drudgery reduction practices in agriculture.
- 12. Fruit preservation practices.

Technology Inventory and Activity Chart – III

4. Details of each of the technology under Assessment, Refinement and demonstration

- a. Detailed account on varietal/breed characters for each of the variety/breed selected for FLD and OFT
- b. Details of technologies that may include formulation, quantity, time, time, methods of application of nutrients, pesticides, fungicides etc. for technologies selected under FLD and OFTs
- c. Details of location/area specificity of recommended technology viz., for each of the variety/breed/technology selected for FLD and OFT
- d. a. Introduction of improved planting material of fruit plants & high yielding and hybrid varieties seeds of vegetables to the farmers.
- e. Provide fertilizers for use of balance fertilization in the fruits & vegetable crops
- f. Provide appropriate pesticides to produce high yield free from insect, pest and diseases
- g. Provide technical knowledge about improved cultivation techniques to each selected farmers for respective crops taken under NHM FLDs on fruits, vegetables and seed spices.
